ROR day three/four

1. Lab two_a

a. take new branch from `new_rails` repo, name it "lab_two_a", and create the cruds for a post recourse as we did in the lec,

Post(title:string, content:string)

b. In the same branch, create new recource named " User", with the following attributes (name, DOB, email, phone_number) and validate on the follwing:

b.1 validate presence on all the feilds.

b.2 validate on email structure on the email feild. "Search for it"

b.3 validate the email uniqness on model and DB.

b.4 Your PR title = <your_name>/<your_lab>/lab_two_a

c. In the same branch, create new column on table "User" called address with a migration, and look how to make the address not null.

d. Read the following article about activerecord https://medium.com/@shiiyan/active-record-pattern-vs-repository-pattern-making-the-right-choice-f36d8deece94, and summrize it in the PR discription.

f. Make sure the PR title as the following: "your_name/lab_two_a"

2. Lab two_b migration_war lab ^_^, from the following repo https://github.com/Software-ConstructionV1/migration_war, do:

    a. Create a migration:

        a.1 clone this repo.

        a.2 create a migration that add's a column to the only one model existing.

        a.3 make sure to pull before you push, if some one did push before you, dont forget to migrate then push your commit.

        a.4 make sure to commit the schema.rb changes.

        a.5 the dead line is at the same lecture day at 7:00 PM

    b. The war ^_^

        b.1 the game is that all of you will try to rename your collegues names created in the prevuios step.

        b.2 the game will start at the same lecture day after 7:00 PM, ends before the next lecture.

Notes:

    1. Create a seperate commit for each step or bug.

    2. Write a good description for the PR.
